

Taxes in Connecticut are not only too high but also cover way too many services and products. The time has come for the State Representatives and Senators to cut and eliminate taxes. The middle class in Connecticut needs relief from the present tax burdens created by the State Representatives and Senators in response to lobbying by the State Employee Unions and the attitude of the Democratic Party. The State's economy is in serious trouble due again too many and too high taxes on business. Let's do the right thing this time and cut and eliminate taxes for the middle class and business.

Thank you for your consideration,

Richard J. Collins, Jr.
